**Name:** Chris Hamilton  
**Job Title/Classification:** title (GS-0000-00)  
**Org. Code/Name:** WO-330D, Land & Resources Projects Office  
**Telephone Number:** 303-236-6539

**Past Experience:**

As the IRM Section Chief for Oregon/Washington for 5 years, I led the successful development of the Timber Sale Information System (the National application that tracks bonding and billing of all timber sales conducted nationwide across the BLM). We followed proper Life Cycle Management procedures, had an OR/WA ITIB in place, and satisfied all Configuration Management requirements. Operations and Maintenance of this application is still handled in Oregon.

I was responsible for the development and maintenance of the OR/WA GIS program for 5 years. We were respected as having the best GIS capabilities in the BLM and won several awards at National GIS conferences. In that capacity I provided leadership and direction to most of the other BLM GIS offices to ensure good coordination and communication of lessons learned.

I was the COTR for the OR/WA Support Services Contract for 3 years. We employed over 120 contractors providing the full gamut of IT support, GIS analysis, Application Development, and Database Management services in all 10 field offices in the State. I managed a \$7 million budget each year.
